The Imperial College London Allergy Programme
Imperial College London has places available on The Imperial Allergy Programme for the 2011/12 and 2012/13 academic years. A variety of study options are available:

**Short Courses in Allergy**

All short courses comprise 2 days of face to face teaching at St. Mary’s Hospital, Paddington, London and access to 20 hours of on-line e-Learning to reinforce understanding and knowledge. The courses are multi-disciplinary in their focus and are suited to GPs, hospital doctors, nurses and dieticians wishing to further their skills in allergic disease. Short courses in 2012:

- Allergic Airways Disease and Asthma: Monday 19\textsuperscript{th}/Tuesday 20\textsuperscript{th} March 2012
- Rhinitis and Hayfever: Wednesday 21\textsuperscript{st}/Tuesday 22\textsuperscript{nd} March 2012
- Allergic Skin Disease: Monday 11\textsuperscript{th}/Tuesday 12\textsuperscript{th} June 2012
- Paediatric Allergy: Wednesday 13\textsuperscript{th}/Thursday 14\textsuperscript{th} June 2012
- Allergic Gastrointestinal Disease: Monday 13\textsuperscript{th}/Tuesday 14\textsuperscript{th} November 2012
- Food Hypersensitivity: Wednesday 15\textsuperscript{th}/Thursday 16\textsuperscript{th} November 2012

**Postgraduate Certificate in Allergy**

The PGC in Allergy offers a sound theoretical background to the principles of the mechanisms and management, and a robust practical programme in diagnosis and treatment of allergic disease. It is a 9 month Masters level part-time blended learning course comprising 3 modules – Scientific Basis of Allergy; Diagnosis and Treatment of Allergy; the Cutting Edge of Allergy. Each module involves one week of face to face teaching at Imperial College and 10 weeks of on-line e-learning tasks. Commencement date: 8\textsuperscript{th} October 2012.

**MSc in Allergy**

The MSc is a 2 or 3 year part-time programme building upon the PGC in Allergy syllabus. Students select four of the six short courses and perform an allergy research project. Students benefit from a comprehensive academic training, an introduction to appropriate research methods and practice, and the opportunity for intellectual development within a stimulating and supportive environment.
